Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the post-census data publication process. The Bureau was guided by then Director, Bruce Chapman, and Deputy Director, C.L. Kincannon. Primary direction of the data publication program was performed by William P. Butz, Associate Director for Demographic Fields, assisted by Peter A. Bounpane, Assistant Director for Demographic Censuses, in conjunction with Barbara A. Bailar, Associate Director for Statistical Standards and Methodology, Howard N. Hamilton, Acting Associate Director for Information Technology, James D. Lincoln, then Associate Director for Administration, and Stanley D. Moore, Associate Director for Field Operations. The Director's staff was assisted by Sherry L. Courtland. Direction of the census enumeration and early processing activities was provided by Vincent P. Barabba, former Director; Daniel B. Levine, former Deputy Director; and George E. Hall, former Associate Director.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census was in the Decennial Census Division under the direction of Stanley D. Matchett, Chief, assisted by Rachel F. Brown and Roger O. Lepage, Assistant Division Chiefs. The following Branch Chiefs were responsible for support services: Donald R. Dalzell, Stephen E. Goldman, Judith A. McKay, Dennis W. Stoudt, and Richard R. Warren. The systems design and computer programs necessary for this report were prepared by Valerie Gregg, John R. Murphy, Jr., Eleanor I. Banks, Dan E. Philipp, and Barbara A. Wright.

This report was planned and its content developed in the Population Division by Thomas G. Gelinne of the Poverty and Wealth Statistics Branch. The work was under the general supervision of Roger A. Herriot, Chief, Paula J. Schneider, Staff Assistant for Census Programs, and Gordon W. Green, Jr., Assistant Division Chief. Important contributions were made by Arno I. Winard, Staff Assistant for Poverty Statistics. Also contributing were Kathryn Grossman, Cathleen Tegels, and Eleanor Baugher.

A number of advisory groups and individuals representing or affiliated with universities, research organizations, professional associations, government agencies, and other groups assisted in determining the content of PC80-2 reports.

Administration support was provided by the Administrative Services Division, Robert L. Kirkland, Chief, and William C. Fanning, Assistant Chief.

Computer processing was performed in the Computer Operations Division, C. Thomas DiNenna, Chief, James E. Steed, George M. Bowden, and Joseph J. Sferrella, Assistant Chiefs.

Questionnaire processing procedures were developed in the Decennial Processing Staff, James S. Werking, then Chief, under the direction of Harry O'Haver, then Assistant Chief. The clerical coding and microfilming of the sample questionnaires were performed at three decennial processing locations as follows: Data Preparation Division, Don L. Adams, Chief; Jeffersonville Processing Office, Robert L. Kirkland, then Processing Manager; New Orleans Processing Office, Robert L. Allen, Chief; and Laguna Niguel Processing Office, Robert N. Scheller, Chief.

User services were provided by the Data User Services Division under the supervision of Michael G. Garland, Chief, Marshall L. Turner, Jr., and Paul T. Zeisset, Assistant Chiefs.

Data collection activities were supervised in the Field Division by Lawrence T. Love, Chief, under the direction of Richard Blass, Charles Hancock, and George T. Reiner, Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

Geographic programs and plans were developed in the Geography Division under the direction of Joseph J. Knott, Robert W. Marx, and Silla G. Tomasi, Assistant Chiefs, and Donald I. Hirschfeld.

Publications editing, design, composition, and printing procurement were performed by the staff of the Publications Services Division,

Raymond J. Koski, Chief; Milton S. Andersen, Arlene C. Duckett, and Gerald A. Mann, Branch Chiefs.

The Statistical Methods Division was largely responsible for weighting sample data and producing variance estimates. This work was supervised by Charles D. Jones, Chief; Susan M. Miskura and Robert T. O'Reagan, Assistant Chiefs. Important contributions were made by David H. Diskin, Milton C. Fan, Thomas W. Harahush, Robert S. Jewett, J. Kim, Teresa A. Passalacqua, Charles E. Talbert, John H. Thompson, and Henry F. Woltman.

The system design, technical specifications, assembly, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of the Technical Services Division, C. Thomas DiNenna, Acting Chief, and Robert J. Varson, Branch Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

SUPPRESSION OF DATA FOR CONFIDENTIALITY	IV

GENERAL

This report is part of the *Subject Reports* series and presents sample data from the 1980 Census of Population on the social, economic, and housing characteristics of the population living in the poverty areas of the 100 largest central cities of the United States. A list of these cities, the standard metropolitan statistical areas (SMSA's) of which they are a part, and the census tract composition of the poverty areas in these areas is located at the end of appendix A. Similar data for the 50 largest cities were published in the 1970 Census of Population, *Subject Reports, Low-Income Areas in Large Cities*, PC(2)-9B.

The abbreviated identification for this report is PC80-2 (i.e., Population Census, 1980-Volume 2) followed by a number and letter representing the specific report.

A large portion of the information compiled from the 1980 Census of Population appears in Volume 1, *Characteristics of the Population*, which focuses on data for States, standard metropolitan statistical areas, urbanized areas, counties, places, American Indian reservations, and other geographic areas. For a more complete description of the 1980 census data products, see appendix E.

Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Con-

gress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability for specific subjects appears in appendix A.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and five appendixes), a table of contents, and detailed tables.

Each detailed table is identified by a table number and title. The "stub-head" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

Tables S-1 through S-4 summarize selected social, economic, and housing characteristics for the 100 largest central cities, the SMSA's of which they are part, and the poverty areas in these areas. Data for the five counties of New York city are also shown.

Table 1 through 8 present detailed statistics for the 100 cities combined and each of these cities individually in alphabetical order. Immediately following the data for New York city are data for each of the city's five counties.

Table 1 presents data for the total city and for the poverty areas in the city defined by three alternate poverty rates for persons (20 percent, 30 percent, and 40 percent). Tables 2 through 8 show statistics for the total city and the poverty areas based on the standard definition (census tracts with a poverty rate for persons of 20 percent or more). Table 2 shows data for the total population, the four major race groups, and persons of Spanish origin. Tables 3 through 8 show data for only total, White, Black, and Spanish origin.

Appendix A describes area classifications and provides definitions and explanations for the subjects covered in this report. Appendix B explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix C presents information on the sources of error in the data and editing procedures. Appendix D contains facsimiles of the respondent instructions and 1980 census questionnaire pages. Appendix E summarizes the data dissemination program of the 1980 census.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations may appear in the tables:

- A dash "--" represents zero or a percent which rounds to less than 0.1.

- Three dots "... " mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")
- (NA) means not available.
- CDP is census designated place.
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Bureau of the Census takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this the Census Bureau suppresses data for characteristics

which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below may take place.

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; estimates of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are 10 or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least 10 oc-

cupied housing units within the geographic area; and distribution of data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete-count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This level requires the 30-person or 10-housing-unit criterion be applied individually to each race or Spanish origin category.

Finally, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.

Poverty Areas in Large Cities

A—2. Percent of Allocation for Nonresponse for Selected Characteristics for SMSA's With the 100 Largest Central Cities, by Central City and Poverty Area Residence: 1980 SMSA's	690

CORRECTION NOTE

Shown below are corrections to the data shown in PC80-2-8D.

Median income for families and unrelated individuals below poverty level may not agree in tables S-4, 1, and 5, because of the difference in the income intervals used in deriving the medians.

Table S-1. Summary of Social and Economic Characteristics of Persons in SMSA's With the 100 Largest Central Cities by Central City and Poverty Area Residence: 1980

Excludes inmates of institutions, persons in military group quarters and in college dormitories, and unrelated individuals under 15 years. Data are estimates based on a sample, see Introduction. For meaning of symbols, see Introduction. For definitions of terms, see appendix A)
